## **DETAILED ACTION**

### **Remarks**

A supplemental Examiner's amendment has been made below to fix a typographical error in the claims that was made in the previous Examiner's Amendment on April 23<sup>rd</sup>, 2009.

### **Examiner's Amendment**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Brezner on May 4<sup>th</sup>, 2009.

The application has been amended as follows:

12. A method for treating a liquid sample stream, including a first analyte species ion and matrix ion species of opposite charge to said first analyte ion species, and for detecting said first analyte in the liquid sample stream, said method comprising flowing said sample stream from an inlet in a flow-through treatment channel to a sample stream outlet thereof, flowing a carrier liquid stream including a matrix ion species capture material through said flow-through channel to a carrier stream outlet thereof for removing said matrix ion species away from said first analyte ion species, said sample stream and carrier liquid stream flowing substantially parallel to each other in said treatment channel and forming a liquid interface between them, said matrix ion species

Art Unit: 1797

in said sample stream diffusing through said interface to contact and become bound by said capture material in said carrier liquid by forming a salt or complex or by ion exchange so that the concentration of said matrix ion species at said outlet is at a substantially lower concentration than at said inlet, transporting the sample stream, but not the carrier stream, from said sample stream outlet, in a fluid conduit to a detector, and detecting said first analyte ion species in said sample stream by said detector.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NEIL TURK whose telephone number is (571)272-8914. The examiner can normally be reached on M-F, 9-630.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
